**CHEMICALS**

**XYPEX**

**Gamma Cure**
- **GAMMACURE**
  - Curing agent designed specifically for Xypex Crystaline waterproofing products.
  - May eliminate the need for water during the Xypex coating in some cases

**Concentrate**
- **C2000**
  - Unique chemical treatment for the waterproofing & protection of concrete
  - Can seal hairline cracks up to 0.4 mm

**Modified**
- **XM50**
  - Applied as a second coat over concentrate, Modified produces a harder finish
  - Speeds the curing of concentrate

**Patch n’ Plug**
- **XPP66**
  - Formulated as a crystalline, fast setting, non-shrink, high bond strength, hydraulic cement compound for concrete repairs
  - Stops flowing water in seconds

**Visit us online at [www.jobsitesupply.com](http://www.jobsitesupply.com)**

---

**A7 Adhesive Anchoring System**

**A7 with Nozzle**
- All weather formula, down to 0° and below
- Fast curing time, 35 min at 60°F
- Works in damp holes and underwater applications
- Moisture-resistant formula offers high adhesion for indoor and outdoor use
- Solvent-resistant adhesive

**E-55** Nozzle for A-7
- E24XL Epoxy nozzle 1/2” use with G5 & C5 epoxy
- E102 Epoxy gun for C6-18oz. or G5-22oz.
- A100 Epoxy dispensing tool for use with A7-10

---

**Strong-Seal S Y S T E M S**

**Repair Product**

**Property Damage is Everywhere, Fix it All with 1 Product!**

- Fix Loose Rails
- Repair Cracks
- Bond Broken Concrete

**A9-MB1350HN**
- Repair Spalls/Holes
- Fill Control Joints
- Fill Bug Holes

---

**LM Construction Chemicals, Inc.**

**PermaShine**

The new face of polished concrete

#1 - Level, patch and repair as needed
#2 - Grind to your desired finish
#3 - Harden and densify your polished concrete with FGS/Hardener Plus
#4 - FGS/PermaShine polished concrete. See the results for years to come.

Call Jobsite Supply for Certified Applicators of FGS PermaShine!
CHEMICALS

Global Leader in Concrete Restoration Systems

Self-Leveling Underlayment
- Ultraplan® 1 Plus
- Ultraplan® M20 Plus

Patching Materials
- Mapecem® Quickpatch

Concrete Repair Mortars
- Planitop® FD
- Planitop® X
- Planitop® XS
- Planitop® 1B

Screed Mortars
- Topcem™ Premix

Concrete Repair & Restoration
- Planitop® 18 - fast-setting, one component repair mortar w/ corrosion inhibitor
- Planitop® 21 - two component rendering mortar
- Planitop® FD - self-compacting, full-depth repair mortar

Decorative Toppings
- Ultratop® Natural Gray

Exterior Refinishing
- Concrete Renew
- Concrete Renew-Fine

Corrosion Protection
- 1K Corrosion Inhibitor

Fiber-Reinforced Polymer
- MapeWrap C - Quadri-Ax
- MapeWrap C - Uni-Ax
- Carboplate E 200

Preservation
- Planiseal™ Traffic Coat - 100% solids, epoxy overlay system
- Planiseal™ LVB - low viscosity epoxy sealer
- Planiseal™ WR - silane/siloxane-blend water repellent & sealer
- Mapelastic™ - flexible cementitious membrane

Verticle & Overhead Repair
- Planitop® X - ultra fast-setting, fiber reinforced, vertical & overhead repair mortar
- Planitop® XS - fast-setting, fiber reinforced, polymer-modified repair mortar
- Planitop® 12 SR - fiber reinforced, sulphate-resistant spray or trowel applied mortar
- Planitop® 15 - fiber reinforced fluid mortar
- Planitop® 23 - two-component, fast setting, fiber reinforced repair mortar

Bridge Grouting
- Planigrout® 755 - high-strength, fluid, nonshrink, cementitious, construction grout
- Planigrout® 712 - high-performance, nonshrink cement grout, free of alluminum powder & metallic aggregates
- Planigrout® 740 - high-strength, fluid, nonshrink cement grout
- Planigrout® 830 SP - three-component, high-performance epoxy grout

Bridge & Highway Solutions

Corrosion Reduction
- Planibond™ 3C - epoxy modified corrosion inhibitor
- Mapifier™ 1K - unique polymer, cementitious anticorrosion coating

Structural Strengthening
- MapeWrap™ - fiber reinforced polymer (FRP) structural strengthening system
- Carboplate™ & Maperod™ - pre-impregnated carbon fiber plates & rods in epoxy resins
- MapeWrap™ - two-component epoxy primer, smooths putties & adhesives for wrap

Global Leader in Concrete Restoration Systems
MQ Whiteman SlabArmor
The Way to Achieve Denser, Abrasion Resistant Slab Surfaces

SlabArmor - Applied into new concrete surface with a power trowel!
Ideal Applications - Industrial Flooring - Manufacturing Plants - Warehouses
- Agricultural Facilities - Shop Floors, etc.

- Superior abrasion and wear resistance for longer lasting, low maintenance floors
- Excellent water and stain resistance
- Achieve similar results of Trap Rock and Dry Shake applications without the added expense
- Eliminates the need for Curing Compound and Evaporation Retardants

MQ Whiteman FirstPolish produces a refined, consolidated high-gloss surface using steel trowel blades.

FirstPolish - Polished Concrete look without Diamond Grinding Equipment!
Ideal Applications - Retail Flooring - Airports - Museums - Hospitals - Fire Stations - Prisons - Garage Floors - Basements, etc.

- Same benefits as SlabArmor, PLUS extremely high gloss finish
- Allows faster production schedule. No need to wait 28 days and schedule a separate sub-contractor

**Step 1:** It is a non-film forming solution that is the first step towards obtaining a high-gloss slab surface using trowel blades. Simply spray onto the surface and work in with a ride-on or walk-behind trowel during the finishing process.

**Step 2:** Applied second, it is sprayed onto the surface following the final finishing pass with the trowel. This solution cross-links with the STEP 1 and penetrates into the slab surface producing a consistently higher level of initial hardness and minimizes down time.

**Step 3:** Applied last is a hydrophobic solution applied after major construction is completed, but before the project is turned over to the owner. It prevents water, oils and other contaminants from entering the slab. Additional coatings may be applied according to manufacturers specifications.
Cellofoam®

Warm up Masonry Walls & Floors

Cellofoam® Cavity Wall

Cellofoam® Perimeter Insulation

Cellofoam® Sub-Slab Insulation

Cellofoam EPS Insulation has the compressive strength & the moisture resistance for unequalled long-term performance in demanding below-grade applications such as sub-slab & perimeter foundations. Cellofoam EPS significantly reduces heat loss through concrete floors & walls. Cellofoam EPS is resistant to common soil acids & decay & is easily installed with spot adhesives, fasteners or wall ties. Cellofoam EPS resists moisture & increases thermal performance in cavity wall applications while reducing basement heating requirements.

- R10248 2-1/2" R10 4’x8’ Beveled & Scored / Sheet
- R102x8 2-1/2" R10 2’x8’ Non Scored / Sheet
- PERMA 2-3/8” x 4’x 8’

The ultimate driveway, garage & sidewalk cure & seal.

JS Salt Guard Max
Sprayable surface retarder designed to create a variable etch exposed finish by preventing the hydration of the cement on the surface of concrete placement.

Before After

JS Surface Retarder JS Topcast 05

• Curing
• Concrete
• Finishing
• Sealing

Spray Tip

Sealed with JS Honey Brown

• Specially formulated to seal stamped & decorative concrete
• Non-bubbling formula - Does not create bubbles from fast evaporating solvents
• Slower evaporating than traditional low-VOC products
• Less prone to blushing & whitening from over-application
• VOC compliant

Call us for your VOC Compliant Products!

Chemicals - Patch Repair Products & Garage Floor Epoxies - Curing & Sealing for Sidewalk & Driveway Repair

We have everything you need to create and maintain your concrete.
CHEMICALS & REPAIR

SURECRETE DESIGN PRODUCTS

SureBroom Broom Finish Overlay

SureBroom is a trowelable or squeegee applied cementitious topping for leveling and retexturing both interior and exterior concrete surfaces. When broomed, it creates a texture that resembles freshly poured and broomed concrete. SureBroom is packaged in both a white mix (can add color packs) and a gray mix.

SURECRETE DESIGN PRODUCTS

NEYRA
Neyra Industries, Inc.

Plyolastic - Pourable Crack Filler
Rubberized asphalt emulsion crack filler formulated to be flexible and fast setting for use on asphalt pavements. Provides a tough, resilient barrier against moisture for cracks up to 1/2" in width.
1005504 - 5gal pail
1005504 - 1gal pail

Gatormat - Trowelable Surface Mastic
Blend of asphalt emulsion, high molecular weight acrylic polymer; graded rubber and fine ceramic aggregate designed to fill cracks on asphalt pavement surfaces.
1005602 - 5gal pail

Acrylaseal- Acrylic Pourable Crack Sealant
Cold Applied, fuel resistant, high solids acrylic crack sealant. Provides touch, resistant barrier against moisture for cracks up to 1/2" in width on asphalt and concrete pavements.
